SUMMARY

Results-driven and detail-oriented professional with a strong background in client relationship management, market research, and business growth strategies. Experienced in identifying new business opportunities, developing strategic partnerships, and supporting sales initiatives to drive revenue growth. Skilled in preparing presentations, creating analytical reports, and optimizing workflows to enhance efficiency, strengthen client engagement, and support data-driven decision-making.

TECHNICAL SKILLS

Technical: Python, C, Java, React, FastAPI, Machine Learning, Deep Learning, Data Analysis

Data & Analytics: Excel (Advanced), PowerBI, Tableau, Pandas, NumPy, Matplotlib, SQL, Statistical Analysis

Tools & Frameworks: Docker, Git, REST APIs, OpenCV, scikit-learn, TensorFlow, Linux, CI/CD

EXPERIENCE

Business Development Associate | *Purshotam Profiles Pvt. Ltd.*

Jan 2025 – Present

- Researched and identified new business opportunities in the solar projects sector to support revenue growth, market expansion, and strategic partnerships.
- Prepared client-facing presentations, proposals, and performance reports to strengthen client engagement and support data-driven decision-making.
- Collaborated with cross-functional teams to optimize sales processes, improve operational efficiency, and drive measurable results across verticals.

Computer Vision Intern | *TechEagle Innovations Pvt. Ltd.*

Apr 2024 – May 2024

- Developed a computer vision-based drone system integrating YOLOv5 with real-time feedback control for stability, autonomous navigation, and obstacle avoidance.
- Designed and simulated an autonomous landing system in ROS and Gazebo using Python, OpenCV, and ArUco markers for precise coordinate-based landings.

IT Intern | *Sankalptaru Foundation*

Jan 2023 – Mar 2023

- Built predictive models using Python, Pandas, and scikit-learn for forecasting farm conditions to boost agroforestry planning and resource optimization.
- Performed statistical demand analysis with Matplotlib and NumPy to support sustainable farming strategy, resource allocation, and operational planning.

PROJECTS

Event Planner | *React, FastAPI, REST API, LLM*

- Built a web-based platform using React (frontend) and FastAPI (backend) with integrated AI assistant for automated event description generation.
- Implemented LLM-powered prompts to streamline event management, including RSVP handling, personalized content creation, and scheduling automation.

Handwritten Text to LaTeX Converter | *Python, OCR, Image Processing, ML*

- Built a pipeline using OCR to extract text from handwritten notes and LLM-based prompt templates to generate accurate LaTeX documents.
- Automated conversion process and optimized output quality by fine-tuning prompts for mathematical expressions and structured formatting.

Trackpad Control using Hand Gestures | *Python, OpenCV, MediaPipe, PyAutoGUI, NumPy*

- Developed a real-time hand gesture-based trackpad control system with efficient hand tracking, smooth cursor interaction, and high responsiveness.
- Optimized the processing pipeline with multi-threaded detection to ensure high accuracy in gesture detection and minimal latency.

EDUCATION

Christ University

Bengaluru, Karnataka

B.Tech. Computer Science & Engineering, Honors in AI & ML

2021 – 2025

Delhi Public School

Agra, Uttar Pradesh

Senior Secondary School (CBSE)

2019 – 2021
