SUMMARY

Analytical and results-oriented professional with a STEM background and hands-on experience in data analysis, predictive modeling, and business operations. Proficient in Python, SQL, and Power BI, with a strong interest in data-driven decision-making. Committed to translating complex data into actionable insights that drive business performance.

EDUCATION

Christ University <i>B.Tech. Computer Science & Engineering, Honors in AI & ML</i>	Bengaluru, Karnataka 2021 – 2025
Delhi Public School <i>High School & Senior Secondary School</i>	Agra, Uttar Pradesh 2007 – 2021

EXPERIENCE

Business Analyst <i>Purshotam Profiles Pvt. Ltd.</i>	Jan 2025 – Present
Analyzed and managed sales and marketing processes for Module Mounting Structures by gathering client requirements, preparing data-driven reports, tracking order progress, and evaluating lead performance to support business growth and improve client satisfaction.	
Computer Vision Intern <i>TechEagle Innovations Pvt. Ltd.</i>	April 2024 – May 2024
Developed a computer vision-based drone system integrating YOLOv5 with real-time feedback control for enhanced stability, autonomous navigation, and obstacle avoidance using Python, OpenCV, PyTorch, and ROS.	
Junior Software Developer <i>TechEagle Innovations Pvt. Ltd.</i>	May 2023 – June 2023
Designed and simulated an autonomous drone landing system in ROS and Gazebo using Python-based control logic and OpenCV with ArUco markers for precise, coordinate-based landings via onboard camera detection.	
IT Intern <i>Sankalptaru Foundation</i>	Jan. 2023 – March 2023
Developed a predictive model using Python, Pandas, scikit-learn, and NumPy to forecast farm conditions, and performed market analysis with Matplotlib and statistical techniques to identify demand trends and support agricultural planning.	

TECHNICAL SKILLS

Python, MySQL, MongoDB, PowerBI, C, Java(basics), UI Path, Machine Learning, Data Analysis, Tableau, React, FastAPI, HTML,CSS

PROJECTS

Forest Management System <i>Arduino, Infrared & Temp Sensors, Wi-Fi Module, Buzzer, Embedded C</i>
Built a real-time forest monitoring system using Arduino and sensors to detect fire, water levels, and temperature changes, and showcased it at Microsoft on Arduino Day for its environmental impact.
Event Planner <i>React, FastAPI, Rest API</i>
Built a full-stack Event Planner application with FastAPI REST API backend and React frontend, enabling users to create, view, and RSVP to events with real-time updates and lightweight in-memory data management.
Converting of Handwritten text to Latex <i>Python, OCR, Image Processing, ML</i>
Used OCR and machine learning to convert handwritten text to LaTeX by mapping characters to formatted mathematical and textual commands.
Trackpad Control using Hand Gestures <i>Python, OpenCV, MediaPipe, PyAutoGUI, NumPy</i>
Created a real-time hand gesture trackpad control system optimizing the pipeline for efficient hand tracking and responsive trackpad interaction.
Student Academic Performance: Impact on Self Esteem <i>IBM SPSS</i>
Surveyed students across various universities and analyzed collected data using SPSS by IBM for finding correlation between students academic scores and self esteem
